github.com/Dareean

Front-End Developer specializing in the React and Next.js ecosystems, with a strong foundation in UI/UX design. Experienced in leading large teams, including managing the annual computer science festival (I-Fest) and being active in the tech community in Palu. Focused on building efficient, easy-to-manage, high-performance web applications for end users.

Technical Projects

Medicflow – Medical record management platform | *Front-End Developer* | 2025

HammerCode Palu | September – December 2025

- Building a web interface focused on fast access to medical records for doctors and patients
- Implementing an authentication and access rights management system (RBAC) to maintain the privacy of sensitive data
- Optimizing application performance using Next.js and TypeScript to ensure smooth navigation even when handling complex data
- Tech Stack: React, Next.js, TypeScript, Tailwind CSS.

JasaKita – Local Service Marketplace | *Lead UI/UX Designer* | 2025

Recursion UH 1.0 | February – March 2025

- Designing user flows to connect newcomers to Palu City with trusted local service providers
- Conducting user research to ensure that the mobile-first design can be easily operated by people of all ages.
- Producing high-fidelity prototypes in Figma
- Tools: Figma, User Research, Prototyping

DreamPOS – Inventory Management System | *Full Stack Developer* | 2023

PT Educa Sisfomedia Indonesia | July – September 2023

- Developing a point-of-sale (POS) system in the form of a team that includes stock management, barcode creation, and automatic sales reports
- Integrating report export functionality to Excel
- Tech Stack: PHP, MySQL, JavaScript, Bootstrap

Leadership & Organizational Experience

Chief Executive – I-Fest 2026

Person In Charge | January 2026 – Now

- Fully responsible for planning the largest technology festival in the Department of Information Technology, ranging from management and coordination of divisions with industry partners
- Leading various committee divisions to ensure that audience targets and event quality are achieved according to the *timeline*.

Public Relation – Palu Developer Day 2026

Organizing Committee | September 2025 – February 2026

- Assist in developing content calendars and effective information distribution strategies to build public engagement, resulting in an increase in registrants organically and through community partnerships.

HammerCode Programming Community

Active Member | December 2025 – Now

- Participate in weekly technical discussions, code reviews, and knowledge sharing about *frontend tools development*.

Programming Tadulako – UNTAD

Mentor Coordinator | January 2025 – Now

- Facilitating communication between mentors and community members, ensuring the availability of competent instructors for each technical learning module
- Maintaining the organization's rhythm through disciplined meeting agenda management, which has resulted in increased attendance and engagement of members in weekly upskilling sessions

Professional Experience

Gamelab Indonesia | *Web Programmer Trainee*

PT Educa Sisfomedia Indonesia | July – September 2023

- Complete the *Teaching Factory program* by building various web application modules in accordance with industry standards
- Implement clean code practices and Git/Github workflows in a team development environment

PT. Educa Studio | *Web Programmer Intern*

PT Educa Sisfomedia Indonesia | February – June 2023

- Translating technical specifications from mentors into the development of a responsive website interface (frontend) with clean code structure.
- Building a final project (SME Project) in the form of a functional web application that integrates all learning materials in accordance with industry quality standards.
